Full-Stack Web3 Developer & DeFi Trader

Nigeria (Open to Remote) | 08165180692 | brghtjasper@gmail.com | github.com/Aura-pix | 0xaurora.vercel.app

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, Year 2) at FUT Minna building production-grade full-stack Web3 products. Currently developing **Roomly** — a multi-role student accommodation platform for Nigerian universities (Next.js, TypeScript, Express, Prisma, Supabase, Paystack) — and a **Flash Loan Arbitrage Bot** deployed on Ethereum mainnet using Balancer V2, Uniswap V2, and ethers.js. Active DeFi trader with deep understanding of AMM mechanics, liquidity pools, and on-chain market dynamics. Seeking collaborations, internships, or roles at the intersection of Web3 infrastructure and real-world product development.

PROJECTS

Roomly — Student Accommodation Platform

Full-Stack SaaS Product | Next.js · TypeScript · Express · Prisma · Supabase · Paystack

- Built multi-role platform (Student / Caretaker / Admin) for Nigerian university accommodation
- Implemented Paystack payment integration with 24-hour escrow window and full refund logic
- Architected JWT auth system with refresh token rotation, email verification, and account lockout middleware
- Deployed frontend on Vercel, backend on Railway, DNS via Cloudflare, transactional emails via ZeptoMail
- Domain: roomly.com.ng | GitHub: github.com/Aura-pix/roomly

Flash Loan Arbitrage Bot

On-Chain DeFi Infrastructure | Solidity · ethers.js · Hardhat · Balancer V2 · Uniswap V2

- Built off-chain price scanner polling Uniswap V2 / SushiSwap every 10 seconds for arbitrage spreads
- Wrote Solidity smart contract executing zero-capital flash loan trades via Balancer V2
- Achieved successful test execution on Anvil mainnet fork; deployed to Ethereum mainnet
- GitHub: github.com/Aura-pix

Portfolio Website

Next.js · TypeScript · Tailwind CSS | 0xaurora.vercel.app

- Built personal developer portfolio from scratch using Next.js App Router, TypeScript, and Tailwind CSS

Python GUI Suite

Python · PyQt6 · REST APIs | github.com/Aura-pix/python-gui-projects

- Built Digital Clock, Stopwatch, Weather App (OpenWeatherMap REST API), and QR Code Generator
-
